Takeaway All efforts are on plan. Only paid media carries a decision: \$30,000 (Board plan), judged against CAC targets of \$167 / \$417 / \$882.

Source: GA4 exports 1-28 Sep 2026; Board update 17 Sep 2026; 24F briefing; \$5,000 campaign checklist and T&Cs; Sep and Oct 2026 calendars; Instagram grid screenshot; Performance Analysis deck (X, TikTok).

Paid search lifted traffic and downloads; onboarding did not follow

70%

of September site sessions came from Google Ads

409 of 587 sessions, 1-28 Sep

+36

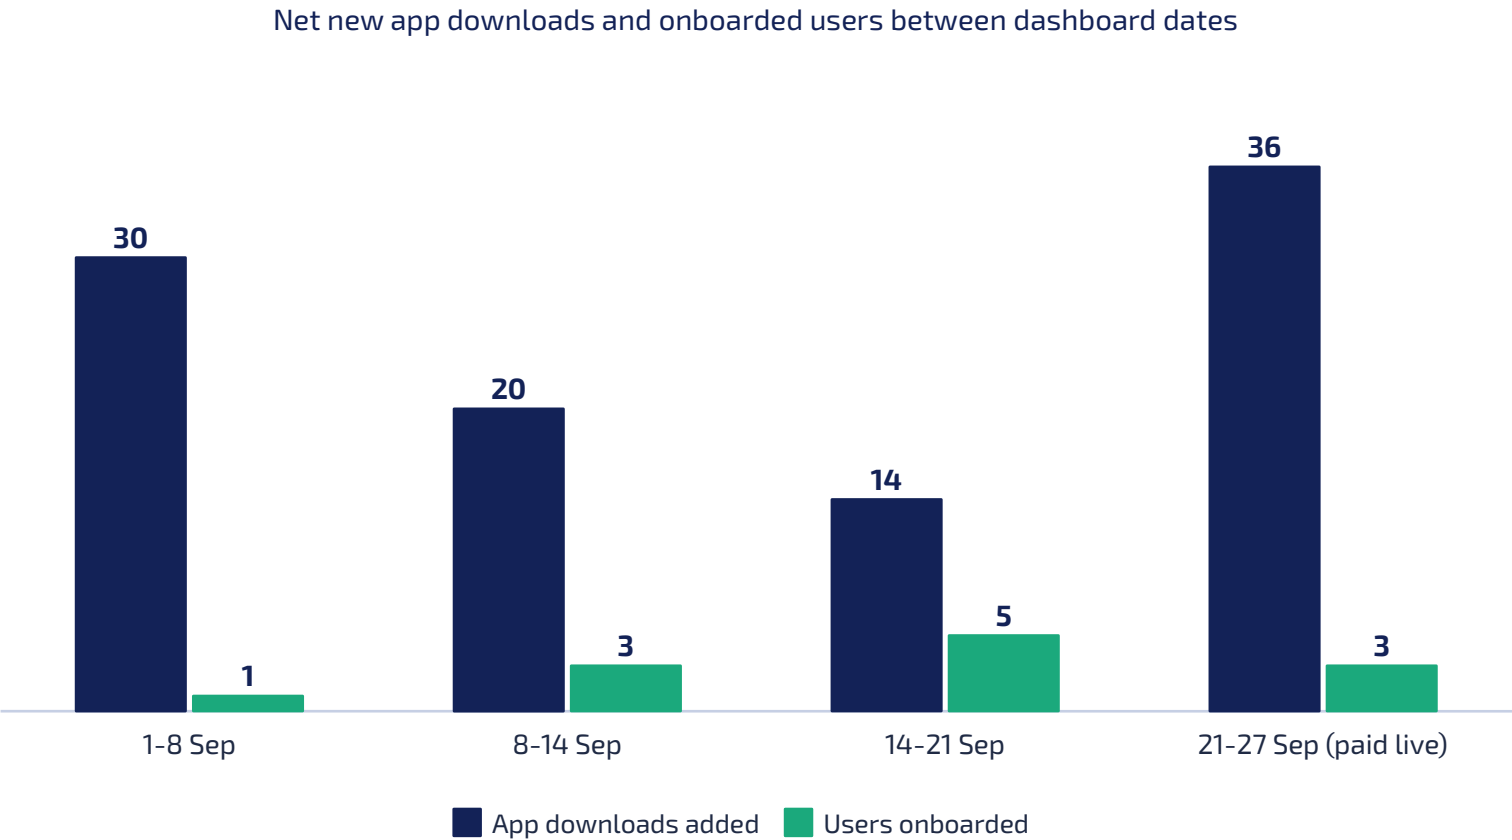

app downloads in the six days after launch

vs +14 the week before

+3

users onboarded in the same six days

60 onboarded, 15 funded, as of 27 Sep

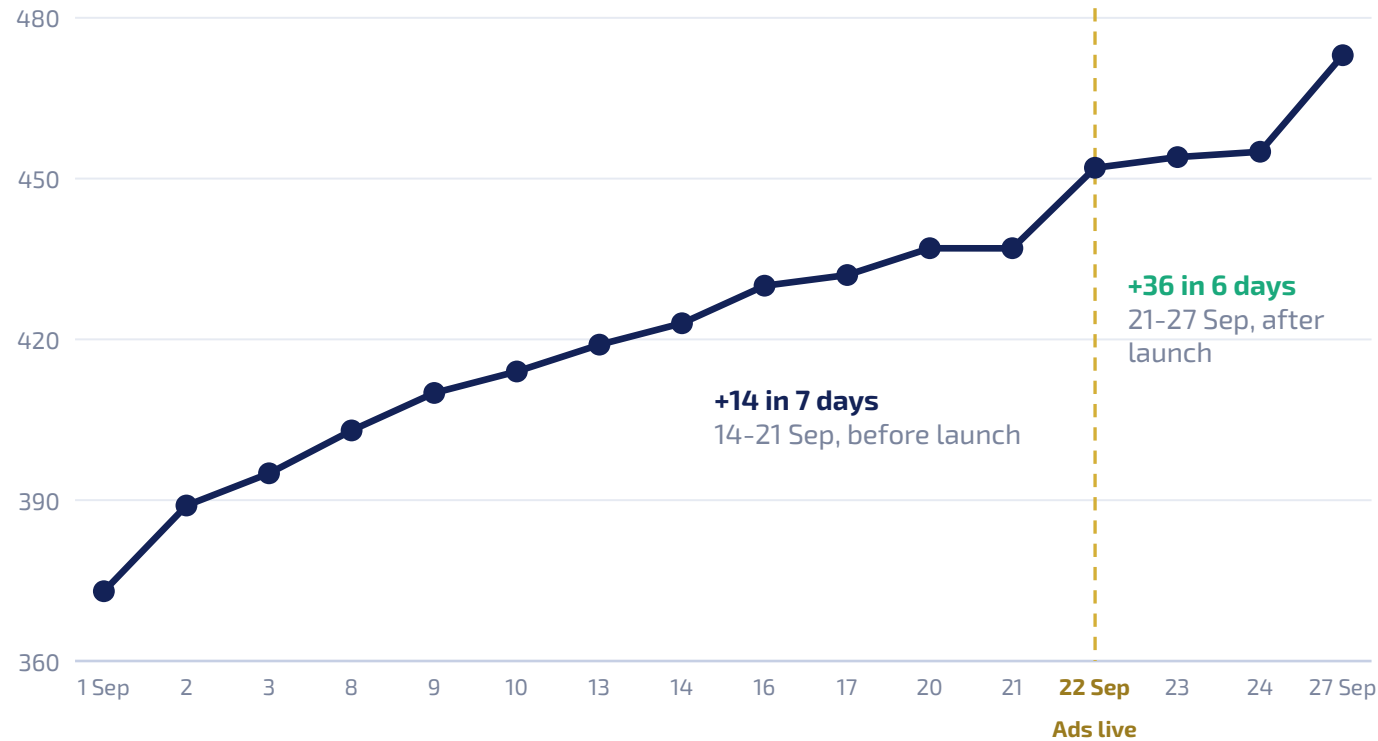

Takeaway The constraint is onboarding, not traffic. Fix KYC completion before spend is scaled.

Source: GA4 exports 1-28 Sep 2026; eMYAA Daily Performance Dashboards, cumulative figures on report dates 1, 8, 14, 21 and 27 Sep 2026 (periods of 6 to 7 days).

Google Ads went live on 22 September; installs then grew at their fastest weekly pace of the month

App installs, cumulative (Android + iOS), by dashboard report date

FROM AD TO ACCOUNT

409 Google Ads sessions
GA4, 1-28 Sep

400 key events on those sessions
event not yet defined

Tracking gap: installs not yet linked to ad clicks

+36 app installs, 21-27 Sep
all sources

+3 onboarded, 21-27 Sep
all sources

Takeaway Paid search is moving installs, but installs are not yet tracked back to the ads. Connect ad clicks to the app link so cost per install can be reported.

Source: App installs: eMYAA Daily Performance Dashboards (Android + iOS, cumulative, on report dates 1-27 Sep 2026). Ads: GA4 Reports snapshot and Google Ads campaigns exports, 1-28 Sep 2026.

English ads lead Arabic on traffic and engagement; Arabic still logs more key events per session

ENGLISH CAMPAIGN

212

sessions

97.2%

engagement rate

19.9s

per session

0.94

key events per session

ARABIC CAMPAIGN

176

sessions

86.9%

engagement rate

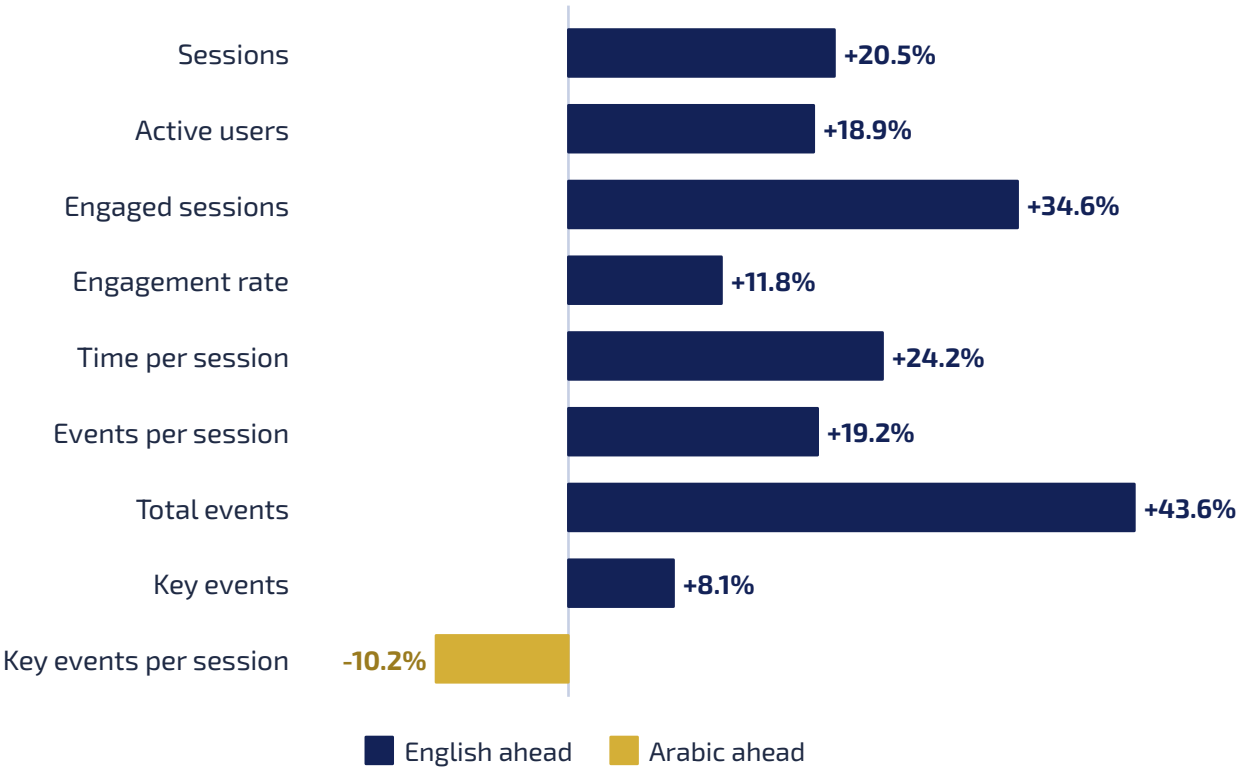

16.0s

per session

1.05

key events per session

English relative to Arabic, % difference, 1-28 Sep

Takeaway English is ahead on 8 of 9 measures. Refresh the Arabic creative to lift engagement, but keep it live: it converts slightly better per session.

Source: GA4 Google Ads campaigns export, 1-28 Sep 2026: 'Website conversion - Saudi - English' vs '... - Arabic'. Campaigns live from 22 Sep. Key event not defined in the export.

Five decisions for today; one open data item blocks the 20 October call

Decision			Owner	By	Open item	Status
1	Go or hold on paid media, judged on cost per account vs Board CAC targets		Marketing with Ignite	20 Oct	No ad spend, LinkedIn leads or key-event definition	Blocks 20 Oct
2	Keep Arabic and English ads live until the key event is defined and costed		Marketing	10 Oct	Deposits: \$12,206 to date, confirmed 29 Sep	Confirmed
3	Follow up every new download that has not completed KYC		Client Experience	10 Oct	No September exports for social channels	Open
4	Monthly data pack: GA4, social, Google and LinkedIn Ads, deposits		Marketing and Malek	8 Oct	793% and LinkedIn +118% / +155% not exported	Open
5	Sign off the \$5,000 campaign T&Cs; close out Mention & Win		Compliance and Marketing	27 Oct	LinkedIn followers: 531 vs 586	Open
					\$5,000 campaign T&C sign-off not on file	Open
					Board slide 3 date: 17 Sep should read 28 Sep	Fixed

Takeaway Ignite must supply spend and lead data before 20 October. Decision 4 closes most of the other open items.
