

eMYAA Marketing & Launch Pivot

Post-Launch Performance Analysis & Strategic Response to Board Feedback

Post-Launch Performance (May 12-18)

Initial Traction Analysis

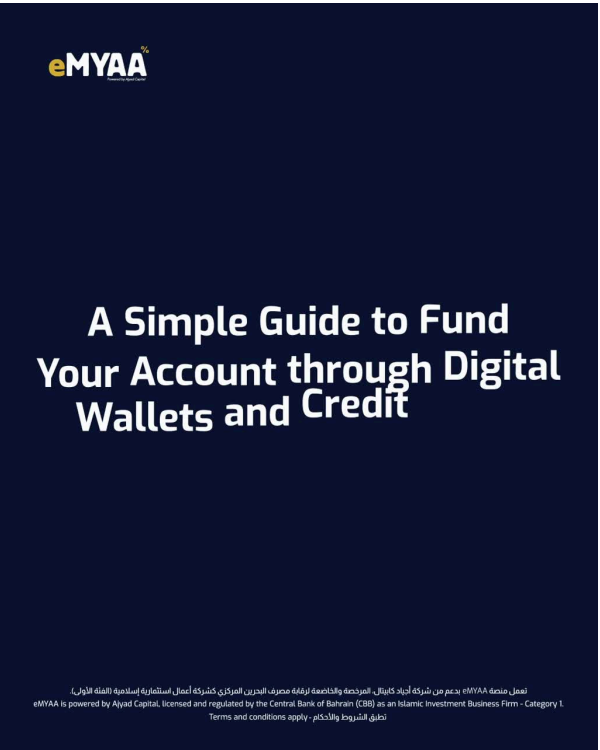

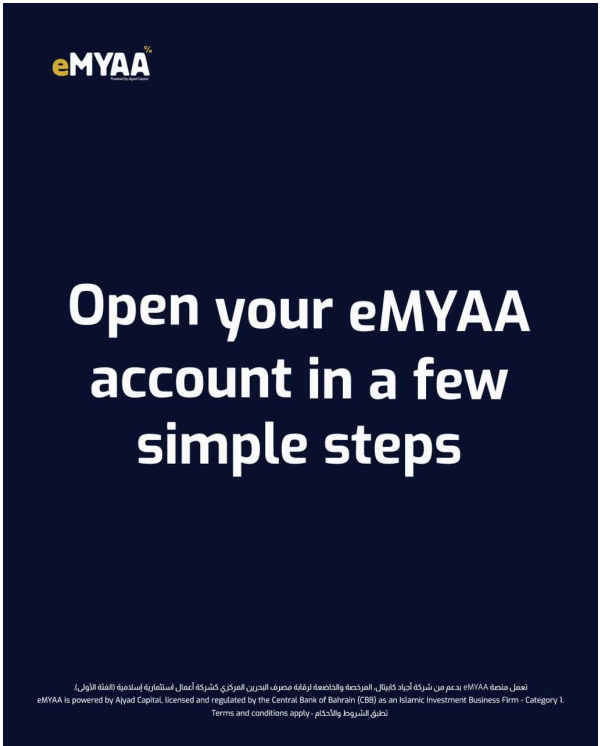

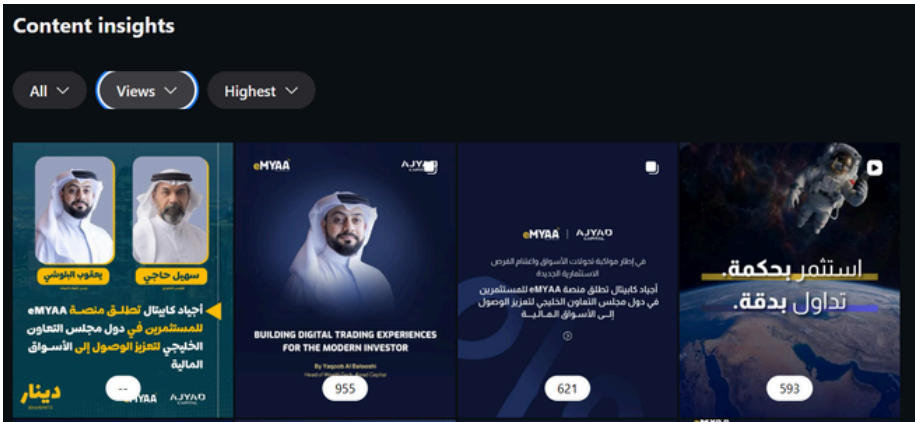

While app ratings are perfect, the conversion from **Download to Onboarded** is currently only 6%. Technical friction in the KYC process is the primary bottleneck preventing funding and trading activity. Increase in Organic Views from 400-500 to around more than 8,000 is a good improvement however with the launch of the sponsor ad the traction would increase.

Multi Content Strategy

Executing a Diversified Creative Framework

We developed a marketing matrix blending high energy hooks, educational guides, and corporate authority content to target investors at every funnel stage.

- **The 3-Second Hook:** High-impact visuals designed for immediate attention.
- **Native Content:** Alternating between corporate polished and TikTok-style engaging edits.
- **Dynamic Rhythms:** Fast pacing and immersive visuals to modernize the brand (like our highly engaged astronaut campaign) to drive excitement and modernize the brand identity.
