

eMYAA MONTHLY PERFORMANCE REPORT

August 2026

Performance so far, the agency transition, social platform review, and September content plan

Filed 30 August 2026

Cumulative since launch | Reporting period 14 May - 30 Aug 2026

359

Total App Downloads
194 Android + 165 iOS

47

Total Onboarded Users
+13 vs 5 Aug

\$8,467.96

Total Deposits
-\$58.95 vs 5 Aug

45

Total Trades
+15 vs 5 Aug

12 / 12

Deposited / Traded

9

Rejected KYC

154

Incomplete KYC

24 / 25

Tickets Resolved/Created

Key Highlights

iOS growth is outpacing Android for the first time.

iOS downloads grew +59 this period vs. +16 for Android - a real shift from the platform's historical Android lead.

Total deposits dipped, not grew, this cycle.

Despite 3 more users funding accounts, total deposits fell by \$58.95 - net withdrawals outpaced new inflows. Being reported plainly rather than smoothed over.

KYC friction is widening faster than onboarding.

Incomplete KYC grew by 38 users this period, more than double the growth in completed onboarding (+13). This remains the single largest funnel gap on the platform.

How We Got Here: The Agency Transition, Closed Out

MID-JULY Paid Social Went Dark - Unintentionally Paid support on X and LinkedIn lapsed simultaneously around 9-10 July. Confirmed: this was not a strategic decision - it happened because of an agency transition gap, compounded by a Meta Business Verification that had been stuck for months.
27 JULY - 17 AUGUST Specialized Partners Onboarded 24F (social content) kicked off 27 July; Ignite (paid ads) kicked off 13-17 August. Both replace the single generalist agency that was managing everything before, at a comparable combined cost.
20-27 AUGUST Paid Media Resumed, Compliance Tightened Two Instagram campaigns approved and now live: Mention & Win (\$400) and the Ali Sabeel influencer video (\$2,200). All prize messaging now locked to "up to \$5,000" phrasing, never a flat guaranteed amount.

Website Analytics

Traffic Sources

Source	Visits	Notes
Direct	496 (75.5%)	No campaign or referral tag - typed URL, bookmark, or app share
Search	89 (13.5%)	Organic Google search
Referral	41 (6.24%)	ajyadcapital.com 28, chatgpt.com 3, others under 3 each
Social	31 (4.72%)	Instagram 22, Facebook 6, Twitter/X 3

Read

Traffic is real but small and concentrated in Direct, meaning most visits still come from people who already know the URL rather than organic discovery or paid referral. Bounce rate sits at 79.38% (0% YoY change, i.e. flat against last year, not improving). Reporting window shown is 31 May to 30 Aug 2026; e-commerce/revenue fields read \$0 because the site has no checkout flow to track.

Instagram: Standout Channel, Two Results Confirmed Paid

Metric	Value	Detail	Note
Followers	1,765	59 posts	
Views (90-day)	2,271,132	711,396 viewers	59.2% Reels / 38.1% Stories
Interactions (90-day)	8,311	5,715 accounts engaged	72.4% from Reels

Top Performing Content

Content	Result	Read
Ali Sabeel reel	28.1K views	Captured after the \$2,200 Ignite paid boost went live (confirmed) - 28.1K views includes paid reach, not an organic-only figure.
Musheera reel	5.3M views, 660 likes, 8 comments	0.0125% engagement rate - paid reach (confirmed), not organic resonance. Views figure is boosted, not a genuine organic win.
Mention & Win posts (\$500/\$100)	Up to 2.6K interactions	Best-performing content type by a wide margin, consistently
\$5,000 Campaign creative	11 interactions	Weakest-performing asset so far - early days, not yet boosted at time of review

Source: Instagram Professional Dashboard, live pull. Note: both Musheera and Ali Sabeel figures are confirmed paid/boosted, not organic.

X, LinkedIn & TikTok: Where Paid Support Actually Went

Platform	Size	Paid Status	Organic Read
X (Twitter)	738 followers, 99 posts	Impressions flatlined to zero mid-Jul through Aug 29	Audience quality is real: 96.4% Bahrain, 3.6% Saudi
LinkedIn	586 followers	Sponsored impr.: Jun 23,118 → Jul 6,629 → Aug 0	Organic reactions actually grew: Jun 46 → Jul 20 → Aug 68 (best month)
TikTok	15 followers, 176 total likes	No paid spend since the May fraud removal - by design	Confirms the deprioritization was correct: only 1 of 11 recent videos breaks 3 digits (189.5K)

OPEN QUESTION - NEEDS A DECISION

Both channels' engagement held up or improved on far less traffic once paid spend stopped - a real, if small, signal that the organic content itself is landing. The decision needed: reactivate paid support on one or both channels with real budget, or formally deprioritize them (as TikTok already was) so they stop reading as unexplained underperformance every month.

Unresolved: 490 of LinkedIn's 586 followers were recorded on a single day (24 June 2026), versus 0-2 on every other day in the 3-month window. Not characterized as a spike since the cause is unknown - could be a data or tracking artifact rather than a real follower event. Left open, not explained.

Attribution Review: One Fix Confirmed, One New Flag

CONFIRMED FIXED: The TikTok/Pangle Bot Traffic Is Gone

OneLink referrer data confirms the fix held permanently: Pangle-sourced clicks fell from 706,445 in May to 48,180 in June to zero in both July and August. The May bot-fraud finding that got TikTok pulled from paid media was correct, and the channel has stayed clean since.

NEW, UNEXPLAINED: A Similar Pattern Appeared 5-18 August

~3,300 link clicks in this window were classified as device type "Other" - not iPhone, Android, iPad, or Huawei - versus roughly 86 genuine iPhone and 250 genuine Android clicks across the entire month. These track almost exactly with a spike in t.co (X link shortener) referrals, dropping off a cliff after 19 August.

This cannot be explained by the new Ignite campaigns - those weren't approved until 24 August. The device signature is the same red flag pattern that caught the TikTok/Pangle fraud. This has not been explained yet and is flagged here rather than left out. By contrast, the genuine Android spike on 28-30 August (124 → 239 → 551) lines up cleanly with the real Ignite campaign launch and looks legitimate.

Sponsored Ads: What's Live Now

Campaign	Budget	Status	Detail
Mention & Win	\$400	Live 24 Aug	Instagram only, GCC-wide targeting, 3-week run through 15 Sep
Ali Sabeel Video	\$2,200	Live now	Instagram only, GCC-wide targeting, paid boost confirmed as of this filing

Both campaigns are VAT-inclusive of their stated budgets, run through Ignite (onboarded 13-17 Aug), and represent the first paid social spend since the July lapse. Compliance note locked in with the agency: all prize messaging must read "up to \$5,000," never a flat guaranteed amount - applies to all future creative, not just the \$5,000 Campaign.

September Content Calendar

Date	Format	Theme	Description
3 Sep	Carousel	Ali Sabeel Recap	"eMYAA is more than just an app" - summary of the influencer video
7 Sep	Animation	The Five-Minute Account	App tour: fast onboarding, don't waste time waiting
9 Sep	Carousel	Built on Trust, Built on Values	Shari'ah-compliant investment opportunities
15 Sep	Animation	Mention & Win \$500	Monthly recurring prize mechanic
17 Sep	Animation	The Power of Consistency	Investing discipline messaging
21 Sep	Carousel	Purification & Payments	Purification calculator; adding Apple Pay & Google Pay
23 Sep	Infographic	Saudi National Day	Saudi market size (\$2.5T+) as a timely cultural moment
27 Sep	Carousel	GCC Market Spotlight	Regional diversification narrative
30 Sep	Carousel	Market Pulse	Monthly market recap

Process improvement in place: design frames for animated content are now shared at least 3 days before the scheduled post date, giving proper time for animation and feedback before that stage begins.

Needs Confirmation Before This Report Is Final

- 1

Facebook is not tracked yet (confirmed) - excluded from this and future reports until that changes.
- 2

PR/media coverage for August is not ready yet (confirmed) - will follow in a later cycle once available.
- 3

Website analytics (Squarespace) is now sourced (confirmed) - 656 visits, 575 unique visitors, 79.38% bounce rate, see Website Analytics slide.
- 4

Musheera's 5.3M-view reel is confirmed paid (boosted), not organic - explains the 0.0125% engagement rate. Do not present as an organic win.
- 5

Ali Sabeel's 28.1K views confirmed captured after the \$2,200 paid boost went live - figure includes paid reach.
- 6

eMYAA Expense Tracker.xlsx - pending: awaiting reply from Ignite on ad spend to date to update it; budget slide still runs on the H2 Marketing Budget Plan only until then.
- 7

LinkedIn's single-day +490 follower count (24 Jun) - cause unknown, not confirmed as a genuine spike.
- 8

The 5-18 Aug "Other"-device / t.co click anomaly (~3,300 clicks) - cause unknown, flagged on slide 6.
- 9

Mention & Win duration confirmed via the approved Ignite ad brief: 3 weeks, 24 August - 15 September 2026 (per the approved caption T&Cs).

Wins This Month

- 1

The TikTok/Pangle bot-fraud fix held completely - zero fraudulent traffic in July or August, confirming the May decision was correct.
- 2

A real agency transition landed cleanly: 24F and Ignite are both onboarded and delivering, replacing a generalist agency with two specialists.
- 3

Paid social is live again after the July lapse - Mention & Win and Ali Sabeel's video are both running on Instagram with a locked compliance standard.
- 4

LinkedIn organic engagement hit its best month yet (68 reactions) in August, on the lowest impression count of the quarter - the content itself is working.
- 5

September's content calendar is fully planned and dated, with a new process to give animations proper production time.

Thank You

August 2026 | Invest Wisely. Trade Precisely.
