

eMYAA MONTHLY PERFORMANCE REPORT

July 2026 Filing

Covering June 2026 performance and cumulative results since launch (14 May - 4 Jul 2026)

Prepared for the Board | Ajyad Capital B.S.C. (Closed)

*Of KYC decisions rendered (22 approved / 6 rejected). Does not include the 93 still-incomplete applications, shown separately at right.

Key Highlights So Far

- ▼

Funding and trading rails confirmed live. 6 funded accounts, \$4,235.83 in total deposits, and 18 trades executed by 6 active traders since launch - end-to-end payment and trading flow is operational.
- ▼

Strong early app store traction. 218 total downloads (136 Android + 82 iOS) since launch, with a perfect 5.0/5.0 rating on both stores and no negative reviews.
- ▼

KYC completion is the top priority gap. 93 users started KYC but never finished - more than 4x the 22 who completed onboarding. The new customer service calling initiative (see next slide) is already converting part of this backlog.

Customer Service Calling: A New Retention Lever

Launched the week of 23 Jun 2026 - calling leads who stalled in KYC or never funded after approval, to directly close the gap flagged on the previous slide.

7 of 22

Onboarded After a Call

32% conversion on the priority drop-off list

8 more

Warm & Re-engageable

Mostly just forgot their passport at home

75

Phone-Verification Leads Queued

Calling just started here - 4 contacted so far

13

Approved-But-Not-Funded Leads

The "Funded Gap" - being called separately

Why this matters: these calls are converting people who were already interested - downloaded the app, started KYC, or got approved - into completed, funded accounts, without any new ad spend. Early results are promising: roughly a third of the first priority list converted within days of being called.

The calls are also surfacing real, fixable problems, not just reluctance: at least one approved customer hit a broken local bank transfer (Benefit) error trying to fund his account, and others reported never receiving their username email. Both are now logged with specifics and can be routed to tech/ops as concrete bugs, not vague complaints.

Social Media: June vs. May

Source: TRACCS Social Media Monthly Review, June 2026 (Sprout Social export)

Platform	Follower Growth	Views / Impressions	Engagements
Instagram	1,765 followers (live, 14 Jul; was 774 / +270.3% at 30 Jun)	1,084,794 views (+195%)	1,737 engagements (+194.9%)
Facebook	1 page followed	811,932 views (+88.4%)	8,488 engagements (+112.3%)
X (Twitter)	1,221 followers (+347.3%)	1,179 impressions (-27%)	114 engagements (-41.8%)
LinkedIn	590 followers (+570.5%)	662 impressions (-65.1%)	89 engagements (-80.4%)
TikTok (organic)	Dormant by design	14 video views (-98.7%)	0 engagements

Update since filing: Instagram's live follower count (1,765, as of 14 Jul 2026) is now reflected directly in the table above. Views and engagement figures in the table remain the 30 June reporting-period totals from TRACCS - those have not been re-pulled live.

Read: Instagram is the clear growth engine this month, driven by the GCC Relaunch and Mention & Win pushes. Followers grew sharply on every channel, but content-level engagement fell on X and LinkedIn even as the audience grew - both channels need a steadier always-on content cadence, which the H2 baseline sponsor ads plan is designed to fix. TikTok's organic collapse is expected: paid TikTok was removed after a bot-fraud finding (see next slide).

Sponsored Ads: What We Did

Campaign	Platforms	Window	Spend	What Happened
Long Form Launch	Instagram + LinkedIn	19 May - 1 Jun	\$1,700	231,850 impressions across KSA/Bahrain/Oman/Kuwait, 3,471 clicks
Astronaut	Instagram, TikTok, X	19 May - 1 Jun	\$3,700	Highest raw reach of any May campaign, but TikTok leg later found fraudulent (see next slide)
App Screens	X	4 - 13 Jun	\$500	Small-scale product-focused push, KSA only
GCC Relaunch	X, Instagram, LinkedIn	8 Jun - 8 Jul (in flight)	\$6,700	Still running at filing time - results to be reported next cycle
Mention & Win	Instagram	11 - 18 Jun	\$600	266,218 views, 22,580 clicks, 6 new accounts acquired (~\$100 cost per acquisition)

Sponsored Ads: What We Learned, Why We're Changing, and the Payoff

What We Found	Why We're Changing	Expected Positive Impact
TikTok's May traffic was fraudulent, not just underperforming. CPCs 24-47x cheaper than TikTok's own Dec 2025 baseline, funneled through the Pangle network, 99%+ Android skew, traffic concentrated in Oman/KSA against a Bahrain-centric target.	Bot traffic doesn't just waste spend - it corrupts every downstream metric and was masking the fact that real GCC investors were never being reached on that channel at all.	TikTok removed entirely from paid media (22 Jun). Every dollar once earmarked for it now goes to channels with verified, human audiences - no efficiency lost, only fraud removed.
Human-fronted content beats animation. Dec 2025's presenter-led Instagram/LinkedIn ads outperformed May 2026's animated "Astronaut" creative on real engagement.	Trading and investing content runs on trust. A real person builds credibility with a first-time GCC investor faster than a graphic explainer can.	Funded the new 5-creator influencer program (Phase 1, \$7,579) - a direct, costed response expected to lift engagement on the channels where June's paid ads underperformed (X, LinkedIn).
Audience growth is outrunning content cadence. Every platform gained followers fast in June, but organic engagement fell on X (-41.8%) and LinkedIn (-80.4%) over the same period.	Fast follower growth without a matching content rhythm risks losing the audience as fast as it's gained - new followers who see nothing for weeks disengage before they convert.	H2 baseline always-on ads resume mid-August at a higher, steadier \$4,400/month rate, turning this month's follower spike into a durable, engaged audience instead of a one-time bump.

Sponsored Ads: What We'll Do Next

- 1 No further paid TikTok spend - platform is fully removed from the media mix going forward.
- 2 Favor presenter-led, human-fronted video over animated/stock-style creative across all campaigns.
- 3 Pause baseline always-on sponsor ads July through mid-August, then resume at a higher combined Instagram + X rate of \$4,400/month from mid-August through December, geographically weighted toward KSA and the UAE.
- 4 Layer the new influencer content line (see next section) on top of paid media to give campaigns a consistent human face.
- 5 Report GCC Relaunch results (in flight through 8 July) in the next filing cycle.

What's Next: Three New Programs

Mention & Win

Monthly, Jul-Dec

\$500 prize + ~\$50/GCC country in ad spend, every month. Drives referrals and adds a recurring, low-cost acquisition touchpoint alongside baseline ads.

Influencers

Phase 1 launching now

5 confirmed GCC creators recording presenter-led content for Instagram, X, and LinkedIn - the human element the May/June learnings called for. More creators to follow in later phases.

\$5,000 Campaign

Aug 1 - Dec 31

Most Active Trader Raffle. Every \$500 traded earns a raffle entry; one winner drawn 10 January 2027, prize scaled to their own volume tier up to \$5,000. Built to drive trading volume and re-engage dormant accounts.

Mention & Win + Influencers, In Detail

Mention & Win

Mechanic: mention a friend, follow @emyaa.app, and open or fund an account for a chance to win.
Prize: \$500 winner, every month, July through December.
Ad support: roughly \$50 per GCC country per month (Bahrain, Kuwait, Oman, Qatar, KSA).
Track record: the June 11-18 pilot run already produced 266,218 views and 22,580 clicks on a \$600 spend, converting 6 new accounts.
Budget: \$4,800 total, July-December.

Influencers (Phase 1)

5 confirmed GCC creators recording real, presenter-led talking-head content: Ali Sabeel, Hamed Al Bloushi, Manal Talal, and Musheera (Bahrain), plus Abdulelah Alharbi (Saudi Arabia).
Distribution: Instagram, X, and LinkedIn only - never TikTok.
Phase 1 confirmed cost: \$7,579 (BHD 2,860 incl. VAT).
Additional creators are planned in later phases; total program cost will grow beyond this figure.
Directly answers the "presenter-led content outperforms animation" finding from the May/June ad review.

Note: figure confirmed against Project2 PR quote QT-1858 (30 Jun 2026), BHD 2,860 incl. VAT - supersedes earlier planning figures (\$5,300 / \$6,850). Quote expires 21 Jul 2026 and must be actioned before then.

\$5,000 Campaign: Most Active Trader Raffle

Objective: drive trading volume and re-engage dormant accounts by rewarding activity, not just sign-ups.

Mechanic: every \$500 in cumulative trading volume earns one raffle entry. One winner is drawn at the end of the campaign; the prize is scaled to the winner's own volume tier, up to \$5,000.

Campaign period: 1 August - 31 December 2026.
Draw date: 10 January 2027.

Launch content: a carousel, a motion-graphic teaser ("Trade More. Enter More. Win More."), and an influencer talking-head video go live together on 1 August, followed by a weekly reminder post through the full campaign.

Budget

\$17,000

Promotion & production, Aug-Dec 2026

+ \$5,000

Grand prize, paid after the 10 Jan 2027 draw
(outside the H2 2026 window)

Note to reconcile: the T&Cs finalized this window (Aug 1-Dec 31); an earlier planning note referenced Jul-Sep. This slide uses the finalized T&Cs and current campaign timeline.

What We've Spent So Far

Sponsor Ads line, May-June 2026 (of the \$80,000 total Ajyad Capital marketing budget)

\$16,100

May Sponsor Ads Budget

Long Form Launch + Astronaut

\$11,700

May Spend Recorded

\$4,400 carried forward

\$7,800

June Spend Recorded

App Screens + GCC Relaunch (partial, in flight) + Mention & Win pilot

Of the \$20,000 Sponsor Ads line for 2026, roughly \$2,800 remained as of late June: \$1,500 earmarked for the July sponsor ad campaign and a \$1,300 buffer. The GCC Relaunch campaign (\$6,700, running 8 June - 8 July) is still in flight, so its full cost and results will land in the next report. The Paid Media / Digital PR line still has about \$4,680 of its \$5,000 allocation untouched, and the \$55,000 Strategic Reserve funds everything in the H2 2026 plan on the next slide.

What We'll Spend Next (H2 2026)

Line Item	Budget	Notes
Mention & Win	\$4,800	Every month, Jul-Dec
\$5,000 Campaign	\$17,000	+ \$5,000 prize (paid Jan 2027)
Influencers (Phase 1)	\$7,579	5 creators confirmed; more phases to follow
App Relaunch	\$4,000	Oct-Nov, new UI/UX push
Baseline Sponsor Ads	\$22,000*	\$4,400/month, mid-Aug through Dec

**Baseline Sponsor Ads figures come from two source documents that don't fully agree with each other (\$22,000 vs. a \$6,600 planning-sheet line). Figure above uses the more detailed backing sheet - confirm with Hatem before this slide is treated as final. Ajjad Capital is not attending Fintech Forward this cycle, so that line has been dropped. Against the \$55,000 Strategic Reserve, the confirmed lines alone (excluding the flagged item) already commit \$33,379, before the \$5,000 prize.*

Wins This Month

- 1

Instagram nearly quadrupled its follower base (+270%) and crossed a million monthly views for the first time, powered by the GCC Relaunch and Mention & Win campaigns.
- 2

The Mention & Win pilot converted a \$600 spend into 6 new funded-account leads at roughly \$100 acquisition cost, well inside plan.
- 3

New customer service calling converted 7 of 22 priority KYC drop-offs into onboarded users within days - at zero additional ad spend - and surfaced two concrete tech/ops bugs (a broken bank transfer flow and missing username emails).
- 4

A real fraud problem was caught and fixed: TikTok’s bot-driven traffic was identified and the channel was pulled from paid media entirely.
- 5

Two new, evidence-based programs move into build this cycle: a 5-creator influencer roster (Phase 1) for human-fronted content, and the Most Active Trader \$5,000 Campaign to convert dormant accounts into active traders.
