

Board of Directors Update

MARKET FEEDBACK AND GROWTH STRATEGY

4th of October 2026

BEC Guidance. Actions Taken.

Each BEC recommendation, and what we changed as a result.

UPDATE

Actioned Following the BEC Meeting

Onboarding performance gives eMYAA a firm footing. The actions that follow translate the committee's guidance into growth at scale across the GCC.

Five actions were agreed, and each is reflected in this pack.

01

A forward CAC for every segment, across Google Ads and LinkedIn.

Each segment's CAC is calculated from September to December spend and benchmarked against industry data.

Status: applied in the segment playbook

02

A clear competitive edge for every segment.

Each segment now has a defined competitive edge, based on what eMYAA offers that investor.

Status: applied in the segment playbook

03

Increase the focus on LinkedIn to build credibility.

LinkedIn will take a greater role in building trust, regulatory standing, governance and expertise.

Status: applied in the channel plan

04

Share every GCC influencer collaboration with the committee.

Collaborations will be shared with members by market relevance, so each can share the content best suited to their network.

Status: links to be shared with committee members

05

Strengthen our understanding of the Saudi market.

We will engage the Head of Marketing at Vision Bank to better penetrate the Saudi market.

Status: in progress
