

What We've Completed

In the last two weeks we launched a new acquisition channel and shipped new content. Both are already moving the numbers below.

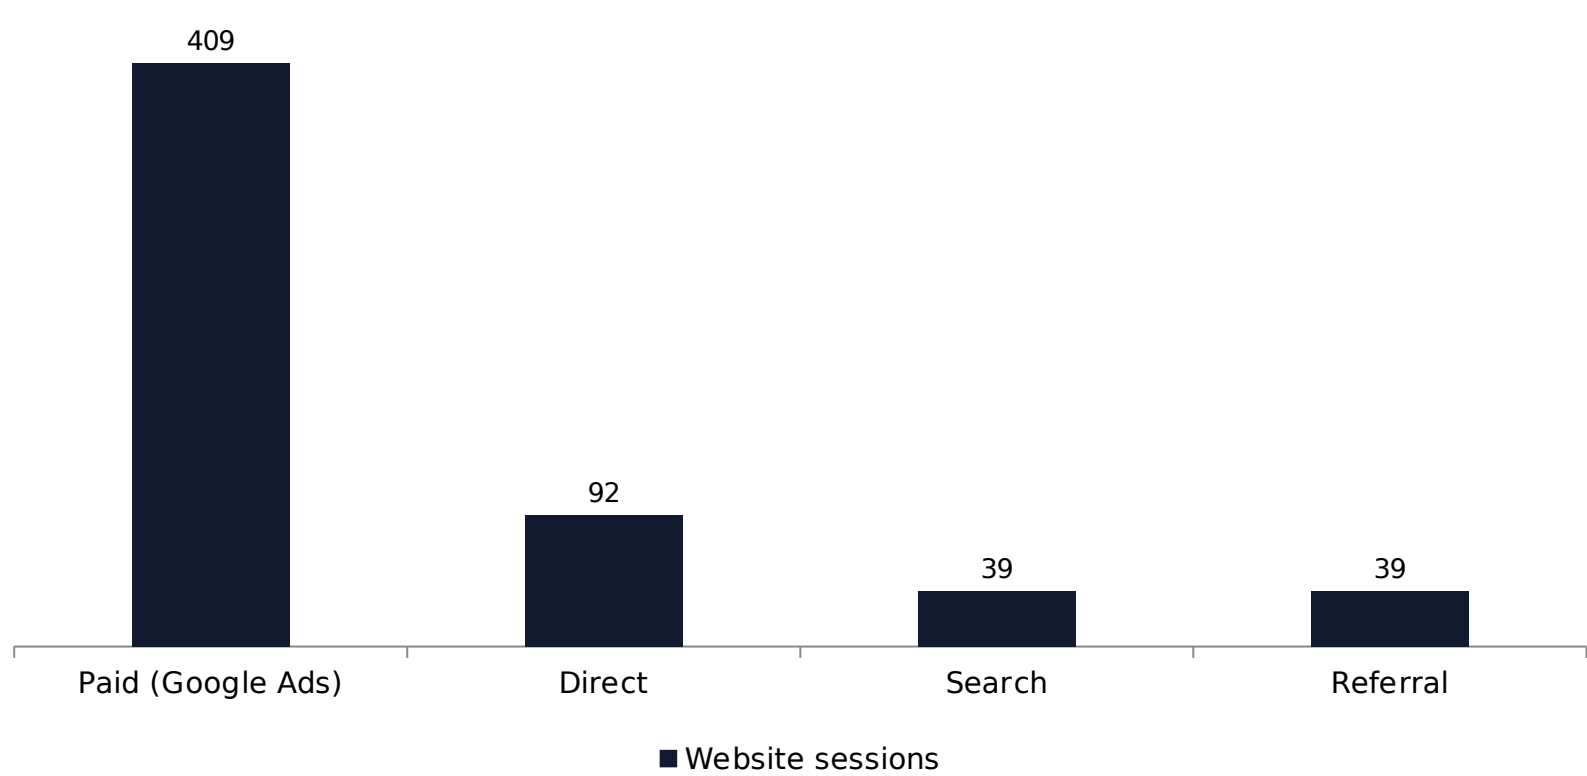

Action	Status	Result
Google Ads & LinkedIn campaign	Launched 22 Sep	Already 69.7% of all website traffic
Mention & Win	Renewed, live 23 Sep to 20 Oct	26.2K views, 1,129 likes on the launch reel
Ali Sabeel video	Completed 18 Sep	1.3M views to date
New "How To" video (human presenter)	Posted	319 views, 28 interactions
Abdulelah Al Harbi video	Posted	Live on Instagram

Google Ads & LinkedIn: The Launch

Launched 22 September as a testing phase: Google Search for Starter and Emerging investors, LinkedIn lead generation for Affluent investors. \$30,000 campaign, September to December, managed by Ignite. Interest targeting covers Saudi Arabia and Riyadh; location is restricted to Saudi Arabia residents only.

Website Traffic by Source, Since Launch

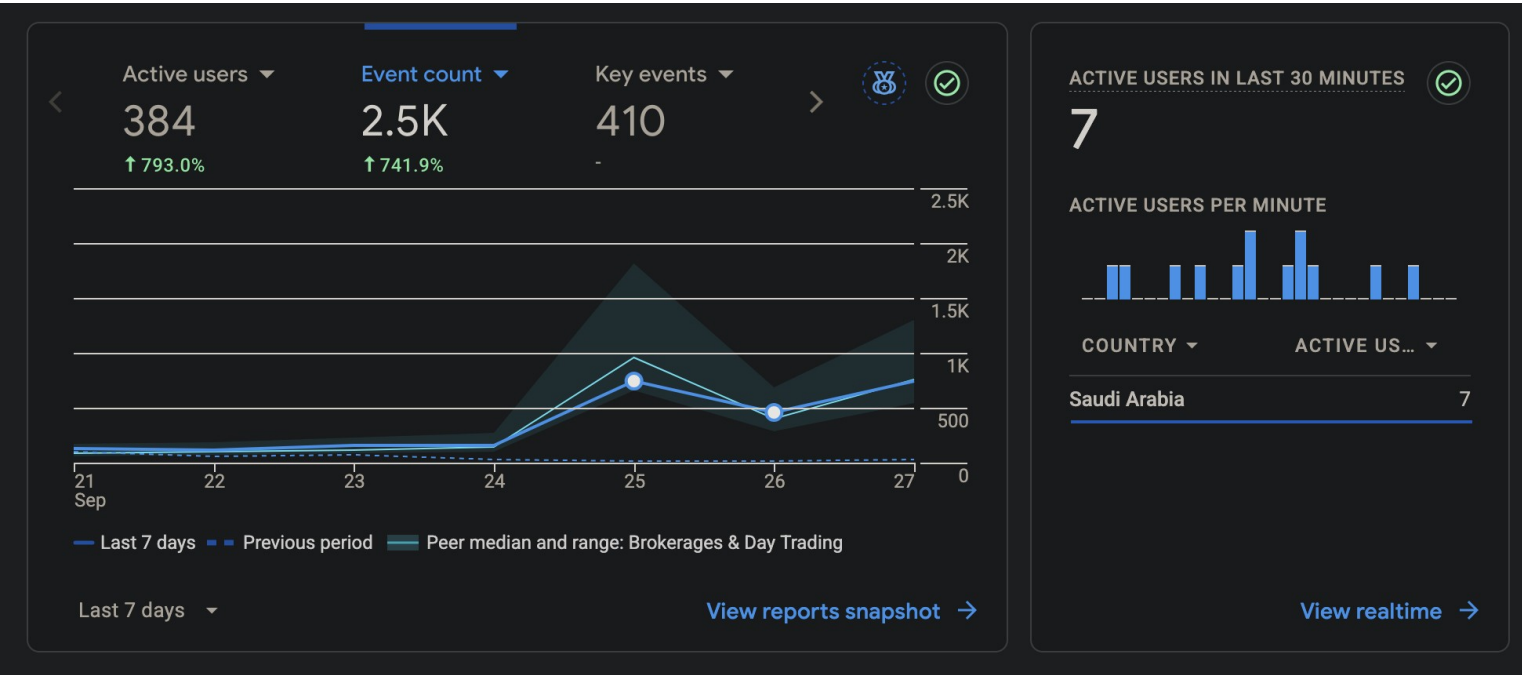

The Effect: Website Traffic

793%
Active users, week over week

558
New users driven to the site

This is the direct line from the campaign to the business: the moment Google Ads went live, paid traffic overtook every other source combined, and total site activity jumped 793% in a single week.

New Video Content

Two new videos went live this cycle, both testing a more human, presenter-led format against our usual graphic style.

Video	Status	Result
New "How To" video, human presenter	Posted	319 views, 28 interactions
Abdulelah Al Harbi	Posted	Live on Instagram, part of the Q3 to Q4 influencer rollout

Q3 to Q4 2026 Rollout: One Creator per Month

Musheera and Ali Sabeel posted. Abdulelah Al Harbi now posted. Manal Talal in production (brief sent). Hamed Al Bloushi scheduled for November.

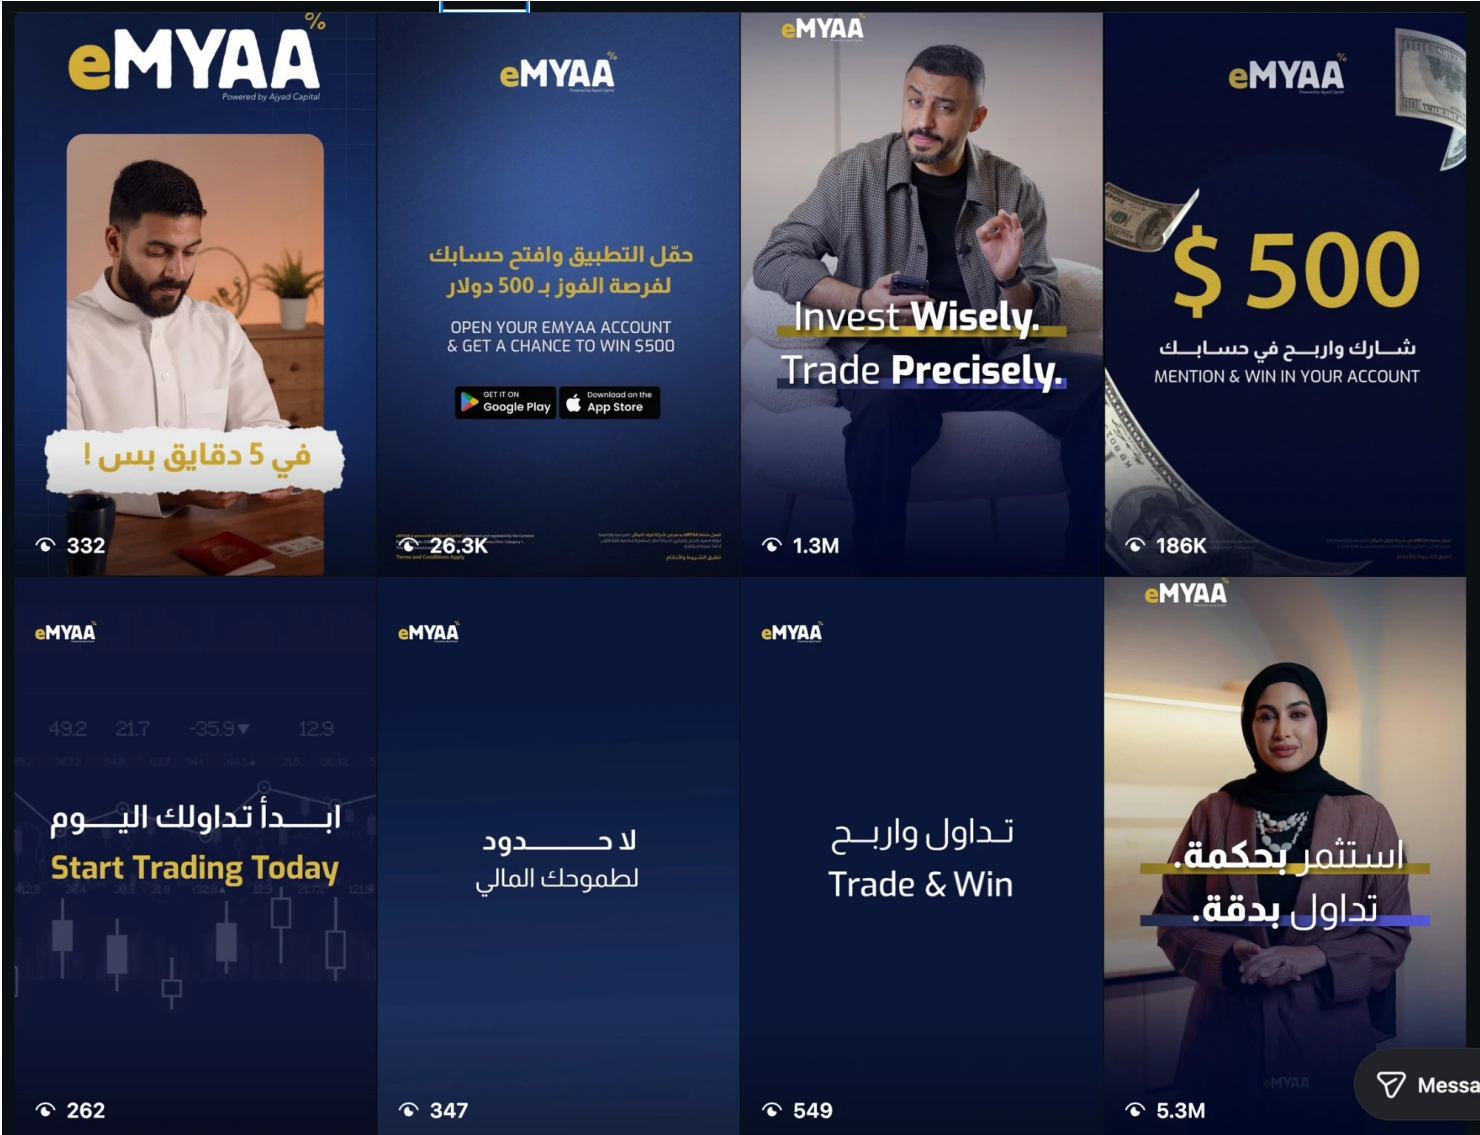

Jul: Musheera	Aug: Ali Sabeel	Sep: Abdulelah	Oct: Manal Talal	Nov: Hamed Al Bloushi
Posted	Posted	Posted	In production	Scheduled

Why this matters: human-led content is a deliberate test against our graphic-only posts, to see which format drives more trust and action.

Best Performing Content

Content	Views	Format
Musheera Reel	5.3M	Video, presenter-led
Ali Sabeel Reel	1.3M	Video, presenter-led
Mention & Win \$500	186K	Graphic, campaign
Saudi Market Size Infographic	515	Graphic, static

The pattern is consistent: presenter-led video reels outperform static graphics by orders of magnitude. This is why we are investing further in human-led formats, like this month’s new "How To" video.

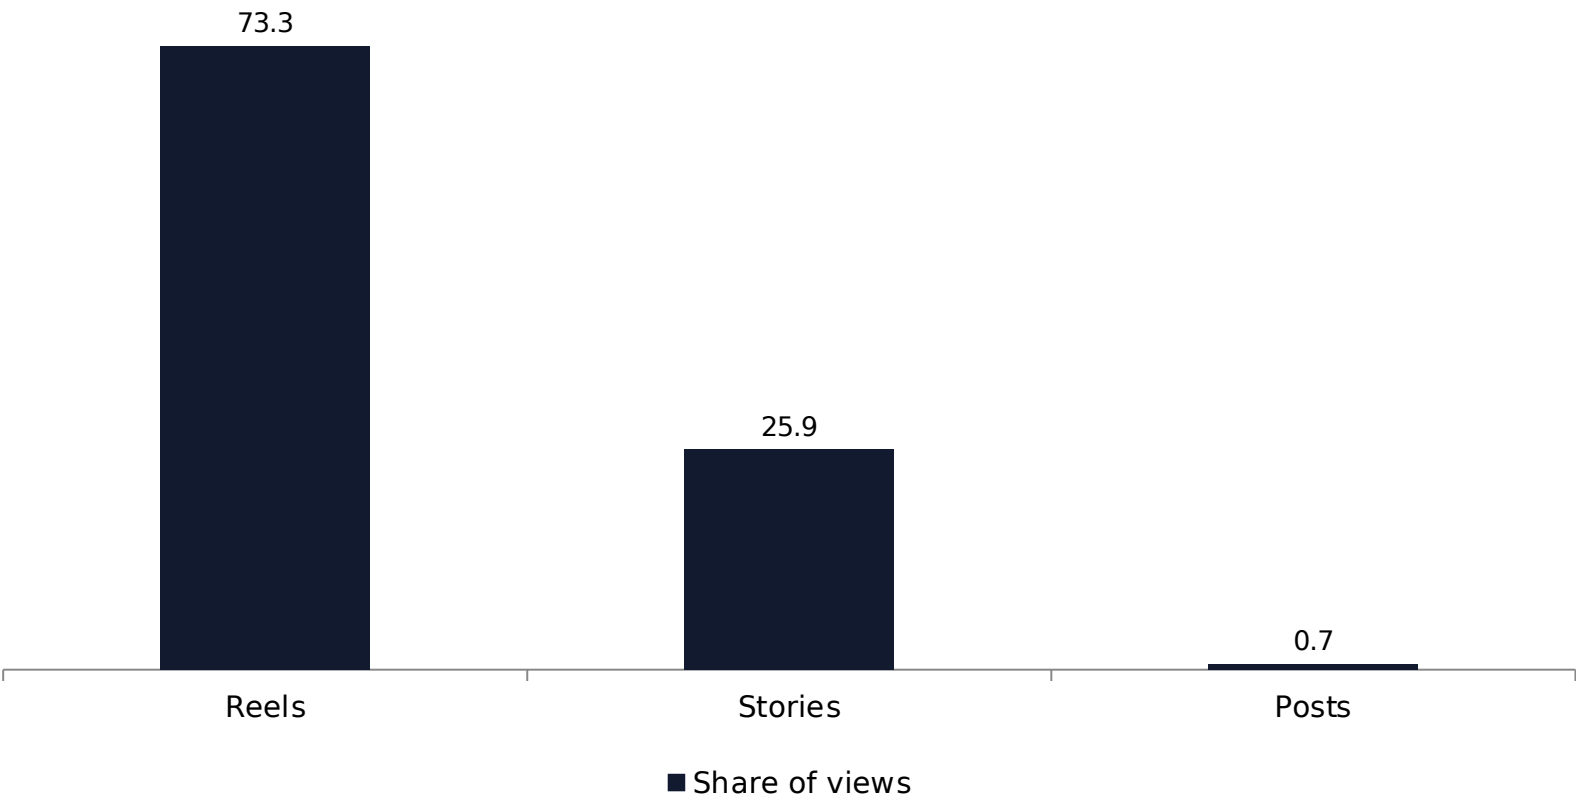

Instagram: Standout Channel

2,116
Followers

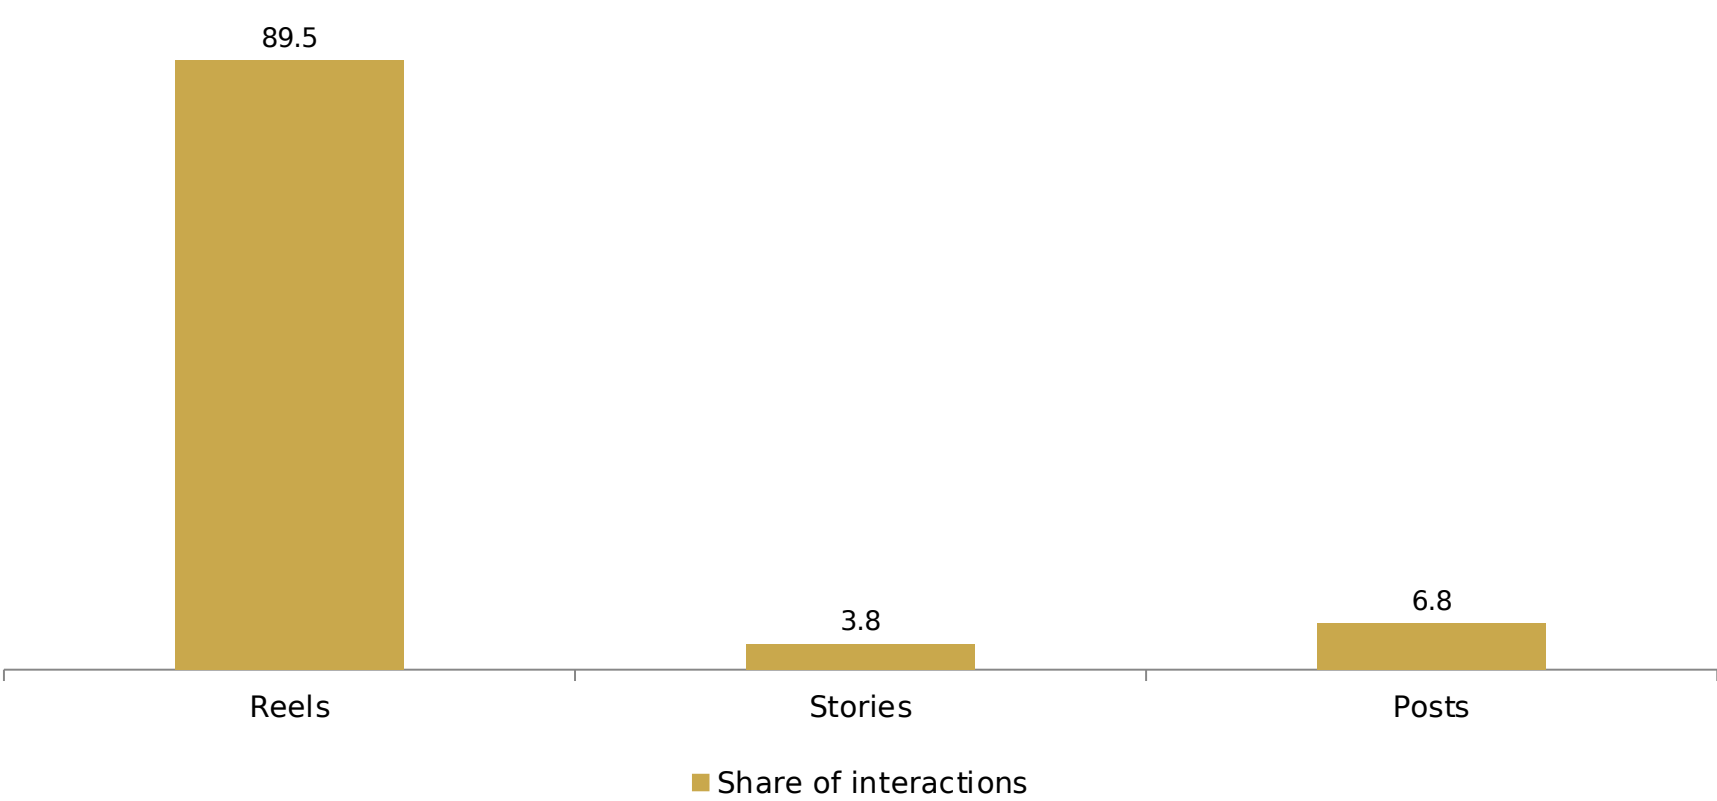

2,271,132
Total Views

8,311
Total Interactions

Views by Content Type (%)

Interactions by Content Type (%)

Reels drive both the views and the interactions. Every format decision this quarter follows this data.

LinkedIn: Building Credibility

531

Followers

+247

New followers, last 30 days

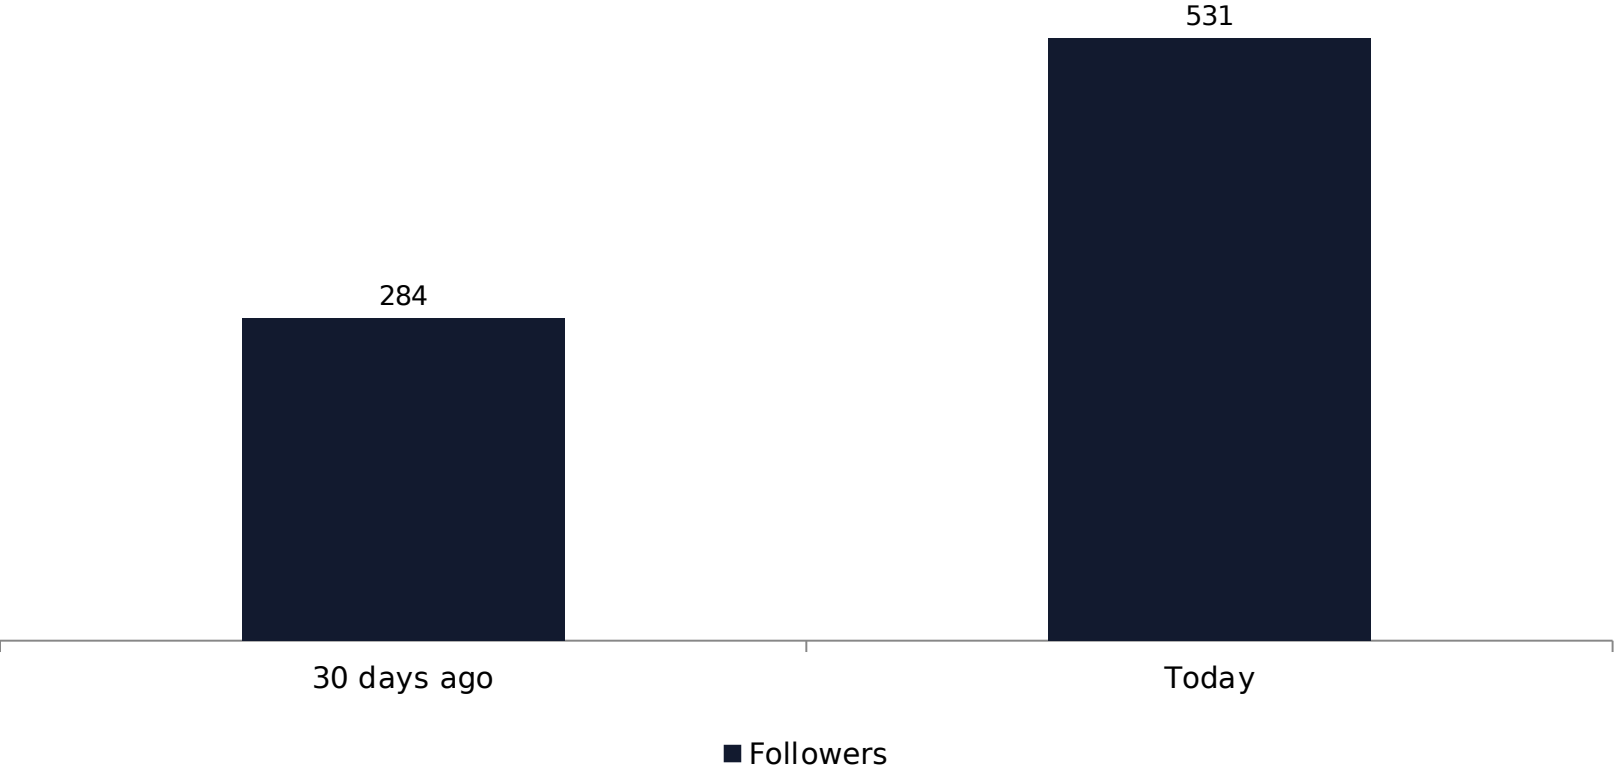

559

Impressions, 13-27 Sep (+118%)

28

Reactions, 13-27 Sep (+155%)

Follower Growth, Last 30 Days

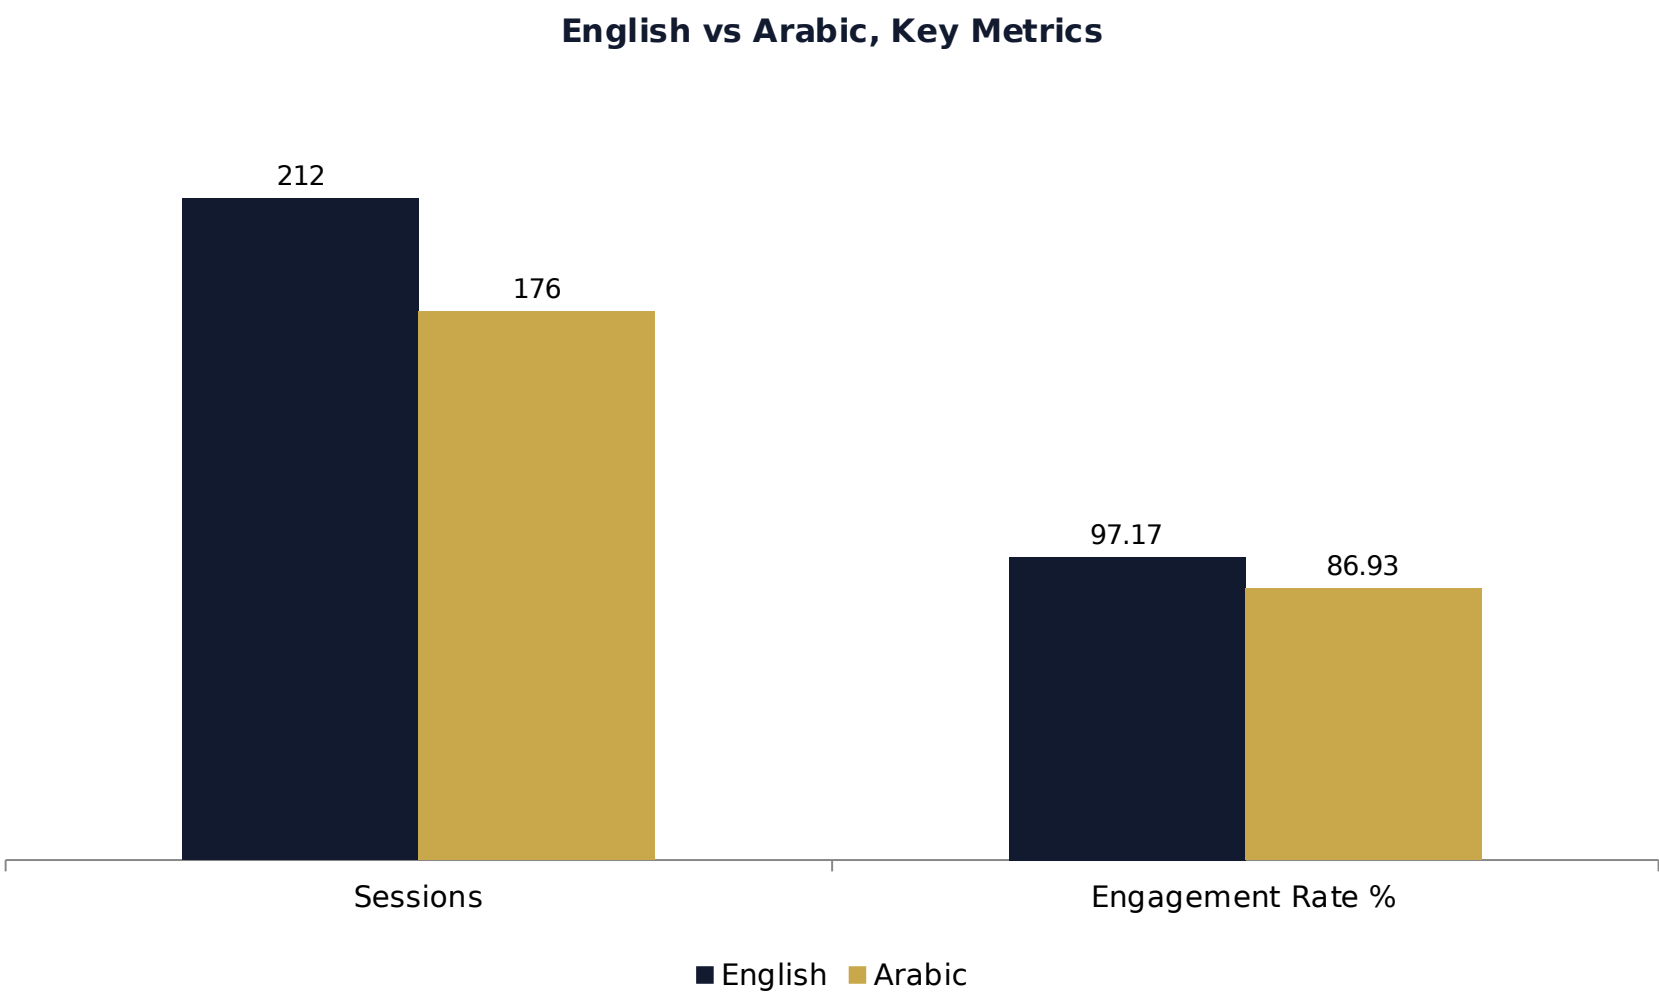

LinkedIn is our credibility channel for the Affluent segment, per the BEC guidance to increase LinkedIn focus for trust and governance. The follower base nearly tripled in 30 days, and it is now also carrying the LinkedIn half of the new Google Ads and LinkedIn campaign, generating leads for Placement.

English Is Outperforming Arabic in Saudi

In testing, the English version of the Google Ads campaign is ahead of the Arabic version on every measured metric.

Metric	English	Arabic
Sessions	212 (54.5%)	176 (45.2%)
Active users	208 (54.3%)	175 (45.7%)
Engaged sessions	206 (57.4%)	153 (42.6%)
Avg. engagement time	19s	16s
Events per session	6.49	5.44
Engagement rate	97.17%	86.93%

This is early data (since 23 Sep) and could reflect ad copy or targeting rather than a true audience preference. Recommendation: review the Arabic creative and targeting with Ignite before scaling spend.

What's Next

Item	Timing	Detail
Google Ads & LinkedIn	Sep to Dec	Scale from testing to full campaign; review Arabic creative first
Manal Talal video	Mid October	Brief sent, production started
Hamed Al Bloushi video	November	Scheduled, per the Q3 to Q4 rollout
Mention & Win	Through 20 October	Continues, GCC-wide, timed before salary days
Fresh KPI export	This week	Requested from Malek, to restore gross deposits reporting

The story so far: a new paid channel launched, it already drives most of our website traffic, and it is paired with a steady drumbeat of new content. The next phase is to scale what is working, fix what is not (the Arabic underperformance), and keep shipping one creator a month through year end.
